

Comprehensive site analysis report

This report shows detailed information to give you an in-depth look at the activity on your web site. This report requires "IP resolution", "Title lookups", and "Whois queries" to be completed before analysis.

Analysis date: 08/02/01 11:46:17 AM

Internet sites analyzed: [Site](#)

First date analyzed: 07/01/01

Last date analyzed: 07/31/01

Analysis content:

1. [Overview](#)
2. [User organization and geography](#)
3. [Request summary](#)
4. [Visit summary](#)
5. [Bandwidth summary](#)
6. [Definitions](#)

Overview

General activity statistics

Number of hits	74,657
Number of requests	41,418
Number of visits	11,188
Average number of requests per visit	3.70
Average visit duration	00:04:08

User organization and geography

Organization breakdown

Number of organizations	1,981
Number of U.S. organizations	960
Number of Canadian organizations	15
Number of International organizations	47
Number of unknown organizations	959

Top 15 U.S. cities

	Organization city	Number of requests
1.	Vienna, VA	1,407
2.	Durham, NC	50
3.	Washington, DC	44
4.	Lakewood, CO	42
5.	Suitland, MD	40

Top 10 requests by directory

Lists all top level directories by number of requests to files within that directory, then similarly lists the second and third directory levels branching from each top level directory. The top 10 files, based on number of requests, are displayed for each directory level.

All top level directories All level 2 directories All level 3 directories Top 10 requests	# of requests	% of requests

Visit summary

Request patterns per visit

Shows the distribution of the top 10 values for "number of requests per visit" over the analysis period. If your goal is to engage users on your site, then you want more users with a larger number of requests per visit, i.e. the graph should be stacked to the right.

# of requests per visit	# of visits	% of visits
1	6,716	60.03%
2	1,574	14.07%
3	862	7.70%
4	500	4.47%
5	255	2.28%
6	227	2.03%
7	146	1.30%
8	141	1.26%
9	91	0.81%

10	72	0.64%
Total	10,584	94.60%

Top 10% of first requests

Lists the top first pages that users see when coming to your site. The data only reflects links from other sites or URLs entered by a user.

Daily visit trends

Shows the number of visits for each day in the analysis period. Weekdays are shown as blue bars and weekends as red ones.

Daily visit statistics

Average number of visits (all days)	360.92
% of visits (weekdays)	79.62%
% of visits (weekends)	20.38%

Visits by day of week

Shows the average number of visits for each day of the week over the analysis period.

Visits by day of week trends

Shows the how the visits per day of week vary over the weeks in the analysis period.

Week	Weekday							
	Sunday	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday	Total
Week of 07/01/01	375	510	385	252	467	442	254	2,685

Total	1,336.12	360.92	

Bandwidth summary

Daily bandwidth trends

Shows the bytes transferred for each day in the analysis period. Check for unusually low or high readings for a particular day of the week. Abnormally low readings could signal a connection problem to your site.
Weekdays are shown as blue bars and weekends as red bars.

Daily bandwidth statistics

Total bandwidth (MB)	1,221.41
Average bandwidth (MB) (all days)	39.40
% of bandwidth (weekdays)	85.68%
% of bandwidth (weekends)	14.32%

Bandwidth by day of week

Shows the average capacity requirements for each day of the week. Understand the best day to perform maintenance or upgrade your site.

Bandwidth by day of week trends

Shows the variation in bandwidth (MB) per day of week over the weeks in the analysis period.

Week	Weekday							
	Sunday	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday	Total

10 pm	0.96	2.44%
11 pm	0.72	1.82%
Avg	1.64	4.17%

Definitions

Hit	Any connection to an Internet site, including inline images and errors.
Request	Any <i>hit</i> that successfully retrieves content. Unlike hits, requests are related to content and user behavior. For example, if a user requests an HTML page that has three graphics files, the web server might make a log entry for the three graphics files, the HTML page, and perhaps add some lines for overhead. However, only one request is counted by Analysis.
Visit	A series of consecutive requests from a user to an Internet site. If your log file data includes <i>referrer</i> data, then new visits begin with referring links external to your Internet site. Regardless of whether or not you have referrer data, if a user does not make a request after a specified time period, the previous series of requests is considered to be a completed visit.
User	Anyone who visits your site at least once. If your log file data contains <i>cookie</i> data, users will be identified by their cookie. If your log files do not contain cookie data, a registered <i>username</i> is assigned to users. Or, if no registration information is available, users' are identified by their Internet <i>hostnames</i> . Many organizations use Internet gateways, which mask the real Internet hostnames, so user counts may be conservative for those users identified by their Internet hostnames.
Organization	A commercial, academic, nonprofit, government, or military entity that connects users to the Internet, identified by an entity's Internet <i>domains</i> . Microsoft Site Server Analysis groups together all domains registered to the same organization as one organization. If a domain is unavailable in the database, one Internet domain is used to identify one organization.
Request duration	The time between two consecutive requests in the same visit.
Visit duration	The time between the first and last request of a visit. This time does not include how long users viewed the last request of a visit.
Ad request	An opportunity to deliver an advertising element to a Web site visitor. An ad request is a measure of the "active technology" that requires the user to interact with the site before a new advertisement will appear.
Ad click	The opportunity for a Web site visitor to be transferred to a location by clicking on an advertisement, as recorded by the server.
Ad click rate	The percentage of ad requests that resulted in an ad click.
Geography	The continent, country, region, state, city, and zip code are based on an organization's Internet domain registration. Only Internet domains found in the Analysis database are included in region, state, city, and zip code analyses. Each Internet domain is associated with only one zip code, so all users from a domain used in multiple locations are considered to be at one location.

This report was created using [Microsoft \(TM\) Site Server Analysis](#).
